

STOCK CONDITION SURVEY

Don't know where to begin with your fire door compliance?

Are you looking for a simple way to survey your fire door stock in a digital format?

Check List

- Do you know if it's a certified door?
- Is it a timber door?
- Is it an FD30 fire door?
- Is the door in a good state of repair?
- Has the door been modified?

Are these some of the questions you're struggling to answer?

Features and benefits:

- Manage and maintain your fire door stock
- Real time data, in line with the latest UK regulations
- Quick and easy to capture information
- Fire door location, address & general condition
- Add photographic evidence
- Individual reports can be created for each door
- Easy to read desktop dashboard
- Dashboard data allows you to make informed decisions on repair or replacements
- Budget for ongoing inspections & maintenance.

The CCS Stock Condition Survey App is a cost effective way to start your path to full compliance

THE GOLDEN THREAD

Dame Judith Hackitt recommends a “Golden Thread of Information” for every building. In her Independent review ‘Building a Safer Future’, she called for changes to the building management control processes.

This recommendation requires the creation and use of a digital record throughout the building life cycle. A trail of information, would benefit all occupiers and stakeholders. This trail would be essential to ensure that buildings were being adequately risk assessed, properly managed, maintained and kept fire safe by those competent to do so.

STOCK CONDITION SURVEY

- Don't know how many fire doors you have?
- Which doors need repair or replacement?
- Quickly establish quantity, condition and location
- Factual information for budgeting and compliance action plan

MOBILE APP

- Manufacturing and installation data available in-app
